IN RE: U S WEST COMMUNICATIONS, INC.	DOCKET NO. TF-99-214
	CERTIFICATE NO. 0002

CERTIFICATE

(Issued September 9, 1999)

On July 14, 1999, U S WEST Communications, Inc. (U S West), filed proposed revisions to several exchange boundary maps. The maps were identified by the Board as TF-99-214. By order issued August 30, 1999, the Board has reviewed the maps, found they substantially comply with IOWA ADMIN. CODE 199-22.20 (1999) and accepted them for filing. The maps make the following changes to the existing U S West exchange boundary maps.

The first change relates to Bent Tree Estates, a subdivision planned for the Council Bluffs area. Approximately 20 percent of the proposed subdivision is currently located in U S West's Underwood exchange, but logically the entire subdivision should be served from the Council Bluffs exchange. The map revision effects the necessary realignment. No existing customers are affected.

The second change involves the Colonial Meadows development, to be located south of Des Moines. The majority of the development will be in the Des Moines exchange, but part extends into the Norwalk exchange. The adjusted boundary will place the entire development in the Des Moines exchange. There is one customer located in the area being transferred. Pursuant to the wishes of that

customer, U S West will continue the customer's service from the Norwalk exchange for as long as the customer remains at that address, after which the service at that address will be changed to the Des Moines exchange.

The third realignment involves the Newport Ridge development, planned for an area that is split between the Des Moines and Grimes exchanges. U S West is transferring the area to the Grimes exchange. No existing customers are affected.

The final realignment concerns the Meadow View development, divided by the boundary line between the Van Meter and Waukee exchanges. The revised map allows the entire development to be served from the Van Meter exchange. No existing customers are affected.

IT IS THEREFORE ORDERED:

The certificate issued to U S West on December 18, 1997, is superseded by this IOWA CODE § 476.29(1) (1999) certificate of public convenience and necessity to furnish land-line local telephone service within the boundaries shown by service territory maps on record on January 1, 1992, with the exception to the following maps, which supersede any earlier maps for these exchanges:
